

I would like to say.. i agree with XM radio. If they are following the rules and did everything correctly.. let them play on...If the regular FM, AM bands are loosing busy do to satalite radio.. its called competition. its like... first we had the steam engine's for trains.... had to run on steam.. so the builders made the engine's but as the years went on a the technoalgy grew it went on to fuel.. so the steam engine's manufactures had to change to make mordern day things or go out of business.

same thing FM, and AM. needs to make changes to keep ahead.

so dont pentilize progress.

if you do you need to get rid of your car... and go back to horse and buggy days... you need to get rid of your A/C in the house and open up the window and put a fan in the window to keep cool.

you chang3ed with progress...

if a person doesnt like the satalite radio's let them listen to the basic FM, and AM.

thnks
